**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This is in response to Applicants' amendment filed October 27, 2003.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 34-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. A proper support for the features of a driver circuit coupled to the three beam directors for providing a signal to the third beam director with a primary frequency including at least one higher order harmonic frequency, as claimed in claim 34 and/or a method step of generating a third period signal comprising a primary frequency and at least one odd harmonic for driving a scanner, as claimed in claim 47 have not been found in the present specification.

Claims 34-51 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action.

Claims 34-51 are allowable over the prior art of record because the prior art fails to teach a resonant beam scanning system and its method comprising a driver circuit

coupled to three beam directors for providing a signal to the third beam director having a primary frequency and at least one higher order harmonic frequency.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Melville 6,049,407 discloses a piezoelectric scanner having a plurality of beam directors.
